

September 2013

Are you unknowingly exposed to these legal OH&S danger zones?

Complying with every operation of health and safety law (OHS) takes a lot of time and effort, so unfortunately we sometimes cut corners. What most business owners don't know is they are personally liable for failure to comply. For example:

1. Regulators have the right to shut down your operations until you do comply
2. Your company faces major fines, penalties and possible jail time
3. Directors are now also personally liable
4. Not complying will lead to losing job contracts and revenues

Directors and supervisors are personally liable. Are you protected?

Suspended sentence for supervisor who recklessly endangered a fellow worker in breach of the OHS Act

- Bradley Alford, a 21 year-old employee of Orbit Drilling was directed by his supervisor, Maurice Barton, to drive an overloaded truck down a steep 10 degree slope.
- The truck lost control and overturned, crushing him to death.
- After an investigation by WorkSafe, Barton was charged with ignoring safety issues and sentenced to 20 months in prison & suspended for three years.
- Orbit Drilling was convicted and fined \$750,000.
- Director of Orbit Drilling, Martin Smith, was convicted & fined a further \$120, 000.

Two men dead & \$140, 000 fines - failing safe work environment.

- Geoff Lucas, a tank driver, and Leon Mobbs, manager at the Broome depot, died whilst at work.
- On the final occasion the tanker exploded, causing fatal injuries to the two men who were standing next to tanker.
- The Baker Hughes Australia Pty was fined \$80, 000 in the Broome Magistrates Court charged for being an employer and failing to provide a safe work environment.
- Directors were also fined heavy penalties
- Oilfield Transport Service was fined \$60, 000 for the same two charges.
